

Shikkee Residential Hydraulic Elevator

Where Chaos Ends

A compact, pitless hydraulic elevator solution ideal for all Shikkee Iconic models.

♥ Why You'll Love It

- Seamless integration: Fits perfectly into all Shikkee Iconic models — minimal civil works, no heavy construction.
- Space-efficient: Pitless or ultra-shallow design (≤ 150 mm) — perfect for both new and existing homes.
- Reliable & safe: Built-in safety systems — emergency lowering, overload protection, anti-fall gear.
- Modern aluminum shaft: Durable, clean, and maintenance-free — complements Shikkee's design.
- Compact system: The motor and pump are built into the shaft — no separate room required.
- Certified & compliant: Meets global safety and quality standards (EN 81 / ASME).
- Peace of mind: 24-month warranty, spare parts availability, and remote support.
- Scalable: Built on a repeatable system that ensures long-term service, easy part replacement, and future upgrades across all Shikkee Iconic models.

✿ Key Features

- Pre-assembled modular aluminum shaft 150cm/200cm
- Pitless / shallow-pit design
- 2 stops (Ground + 1st Floor)
- ~7.5 m travel height
- Capacity 320 – 450 kg (3 – 4 persons)
- Speed range 0.15 – 0.30 m/s
- Overhead drive / pump unit (no external machine room)
- Safety features: door interlock, obstruction sensors, overload protection, rescue lowering, anti-fall device
- Access control: key or smart-card option
- Complies with EN 81-20 / 81-50 and ASME A17.1 / CSA B44

💡 The Shikkee Advantage

Seamlessly part of the Shikkee ecosystem, this elevator is fully plug-and-play — designed to integrate easily into all Shikkee Iconic models, now or in the future.
